

Technical Communication

Relevant and Practical Solutions

Technical Documentation Platform

A simple yet powerful authoring and hosting platform that is better and cost-effective than similar cloud-based platforms and on-premises tools available in the market.

Technical Writing Services

In-house documentation, graphics, videos for clients, where our experts work on the projects outsourced to us.

Why QuickDraft?

QuickDraft's founders, having worked with various types of companies, domains, and tools, have gained relevant industry experience over the years. This exposure has helped them develop the documentation platform with the *right features*, hire resources with the *right skills and experience*, and provide *relevant and useful documentation* that adds value to your product.

We take care of your technical documentation needs so that you can focus on your core areas of work, such as product design and development.
